English: B2

Work permit for the EU is available.

# Resume

## Summary

Frontend Developer with commercial experience since 2015. Specialized in creating user-friendly interfaces for marketing agencies, freelance projects, and client assignments through referrals. Worked both independently and collaboratively to successfully deliver projects.

Started with HTML5/CSS3/jQuery and gradually mastered modern tools like SASS, PHP, and ES6. Developed interactive quizzes, set up analytics goals in Google Analytics and Yandex.Metrica, and created dynamic sections using JavaScript.

Experienced with WordPress CMS: implemented layouts, created custom themes, made adjustments using ACF, managed Custom Post Types and taxonomies, and integrated WooCommerce solutions.

Recently expanded my skills through courses in React, Next.js, Node.js, and MongoDB, focusing on developing modern full-stack solutions. Currently seeking a long-term position in an innovative company that values growth and professional development.
