Resume

Summary

Frontend developer with experience in web development since 2015.

I have worked both independently and as part of teams in marketing agencies and web studios, collaborating closely with designers, project managers, and backend developers to ensure smooth project development.

Currently, I am looking for a company for long-term full-time collaboration, where I can apply my experience and continue my professional growth.

My key skills and experience include:

- Building responsive web pages with JavaScript, HTML, CSS/SCSS based on design mockups from tools like Figma and Photoshop.
- Creating animations and interactive user interfaces with vanilla JavaScript or JQuery.
- Organizing and styling interface components using Styled Components or CSS Modules.
- Working with MongoDB databases using Mongoose for schema design and data management.
- Developing APIs with Next.js or Express for seamless data integration.
- Integrating external APIs to enhance application functionality.
- Building full-stack web applications with React and Next.js.
- Developing custom WordPress themes from Figma design mockups using ACF, WooCommerce, Contact Form 7 and other plugins.
- Managing version control with GitHub or GitLab.
